TCEQ's laws on sustainable fisheries are upheld strictly and those define what comparison levels TCEQ recommends using.

Would it make sense for two comparisons for the data based use/access for the division. The divisions are only for response work only. However, the division D would be more suitable for the comparison to fish consumption and Division A, B, and C for contact recreation based on limited boat access.

Thanks
Adam

Adam,

I've attached comments. Biggest thing is they are using contact recreation PCLs to compare against first, when we are using Texas Water Quality Standards first. TCEQ now wants us to use aquatic life and human fish consumption PCLs as a secondary source to the WQS and contact recreation is only a last resort. We are waiting on TCEQ to send us the updated criteria.

Thanks,

Chelsea

Importance: High

This is TPC's contractor (CTEH)'s water sample results.
The table provided before was TPC's contractor (EAS)'s water sample data.
EPA has sent our data also.

We need a quick turn if possible to determine if trending information is consistent and water sample efforts can be considered for reduction.

Very much appreciate the help.
Adam

Attached is the water data summary from CTEH. It covers 11/27 to 12/7. My apologies, I thought this had been distributed previously!

All,

Please take a look at the attached preliminary surface water sampling summary for CTEH activities from November 27, 2019 to December 8, 2019. Let me know if you have any questions.

Regards,

Pablo Sanchez Soria, Ph.D., CIH
